Driveway Permit Application (If a new Driveway)

Dear Applicant,

We are pleased to introduce to you INSPECTRON INC., the inspection agency now performing plan review and construction inspections for the City of St. Joseph

All projects that create a new structure, change the foot print or roof line of an existing structure, change occupant load, occupancy classification or exit arrangement are required to have a plan submitted for review prior to issuance of a building permit. A complete plan will include all information requested in the Building Permit Application Packet obtained from the City Building Official. These plans will be reviewed for compliance with local ordinances and the Building Code. When approved these plans will be the basis of permit issuance and inspection.

Applications may be obtained at City Hall, 25 College Ave. North St. Joseph MN Plans and completed applications may be delivered to City Hall for the Building Official.

For your convenience the inspectors can be reached from 8:00 a.m. to 5:00. p.m. Monday through Friday at 1-800-322-6153 or 651-322-6626. General questions and inspection requests may be directed to our toll free number. All inspections will be performed within 24 hours of the time requested and all inspections must have a 24 hour advanced notice.

Inspectron Inc. is located at:

Inspectron Inc.
15120 Chippendale Ave.
Suite 104
Rosemount MN 55068

We invite your written comments and questions about the services we provide to you. Please let us know what we do right or wrong.

Sincerely,

Ron Wasmund
Building Official

- VIII. Grading and Erosion control plan approval from Zoning Administrator or Engineer (if more than 50cyds of soil is disturbed or hauled in)

Instructions for Scheduling Inspections

All inspections must be scheduled a minimum of 24 hours in advance.

Inspections **MUST** be scheduled by talking to a live person. No inspections will be scheduled by a message left on the answering machine.

Inspections can be scheduled by calling the office at 1-800-322-6153 or 651-322

All inspections will be performed within 24 hours of the time requested.

Provide us with the permit number and address when requesting an inspection.

Permit Procedure

PERMIT APPLICATION

The applicant shall pick up a Building Permit Application Packet from the Building Official. The Building Application Packet (Packet) shall include:

- Building Permit Application
- Submittal Requirements for Obtaining a Permit
- Survey/Site Plan Requirements
- Name and Phone Number of Building Inspector
- Instructions for Scheduling Inspections

The applicant shall submit the completed application package to the Building Official. The Building Official will review the package for completeness. Additional information may be requested prior to acceptance of the application.

The Building Official will review the building permit application. All plans required to be submitted to illustrate and support the construction will be reviewed for compliance with the latest adopted edition of the Building Code. Type written plan review comments will be provided for all plans reviewed.

The Building Official can issue the building permit after final zoning action by the city council and acceptance of the plans.

The Building Official will place the record of zoning action if required, and the plan review comments on file and issue the permit upon receipt of permit fees. The permit and inspection record card along with the applicant's job copy of the approved plans will be delivered to the applicant

PLAN REVIEW

The Building Official shall perform a review of the plans for compliance with the latest adopted edition of the State Building Code. This time may vary depending on the completeness of the submittal and the complexity of the project. No plan review will be performed on an incomplete submittal. The average standard time for a commercial / industrial plan will be 7 to 10 days.

Upon completion of the plan review the Building Official shall provide the Applicant a copy of the plan review comments in a plan review letter. The issuance of a building permit will be conditional on the applicant's compliance with the plan review comments. When necessary the applicant and the building official shall arrange a meeting to review the comments.

INSPECTIONS

The applicant shall be responsible for scheduling all required inspections with the Building Official. The number of commercial inspections will be determined at the time of plan review. The required residential inspections include:

Footings-	When forms are set but before concrete is placed.
Foundation-	After walls, insulation, and damp proofing are in place but before backfilling.
Mechanical RI-	After gas lines are tested and duct work is started. May be multiple inspections on large projects
Plumbing RI-	After all DWV and water supply lines are installed and tested. May be multiple inspections on large projects.
Fire Suppression-	200 lb hydro test on full system, and final head placement.
Framing-	After plumbing, heating and electrical is roughed in but before insulation.
Insulation-	After insulation and vapor barrier are in place but before sheetrock is started.
Sheetrock-	Only sheetrock required to be fire rated.
Final Mechanical-	After all ductwork, heating plants installed and tested, dampers in place and system is balanced.
Final Plumbing-	After all fixtures are set and caulked and all accessible equipment is in place.
Final Building-	When structure is ready for Certificate of occupancy. All work is complete and final electrical inspection has been made but before any occupancy.

A 24-hour notice is required and shall be provided for all inspections. All Inspections will be performed within 24 hours of the time requested. A Re-inspection fee will be assessed for each requested inspection that is not ready at the agreed upon time.

The inspector shall complete an inspection report for every inspection Performed with one copy to applicant. One copy will be retained for Inspectron, Inc Files.

CERTIFICATE OF OCCUPANCY

A certificate of occupancy will be issued for every new, structurally altered building or a change in occupancy. A copy will be provided to the Applicant, and the Clerk. Inspectron, Inc will retain one copy.

No use or habitation of the new, structurally altered building or change in occupancy will be permitted without the certificate of occupancy.
